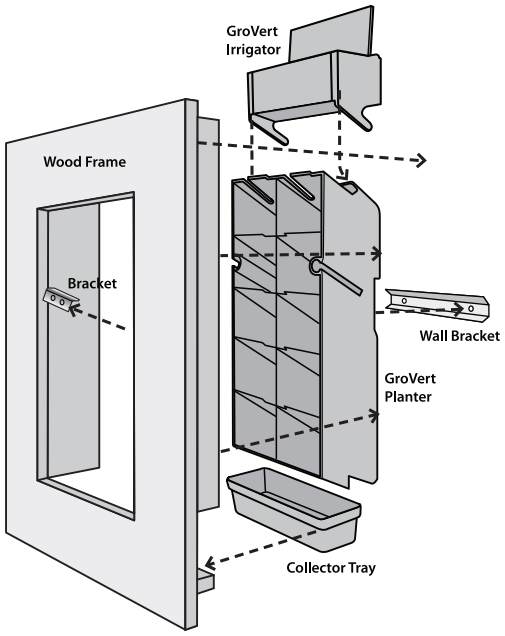
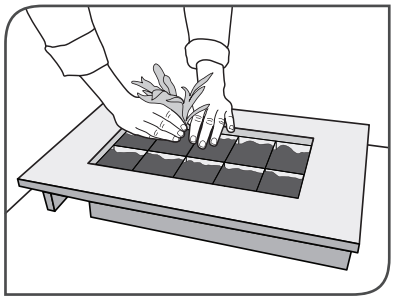
BRIGHTGREEN

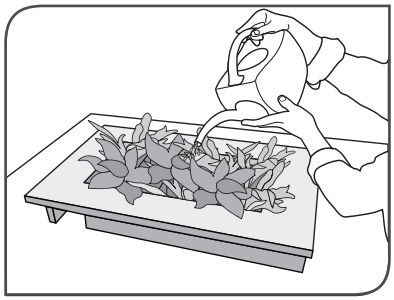
GroVert™

DESIGNER LIVING WALL PLANTER KIT

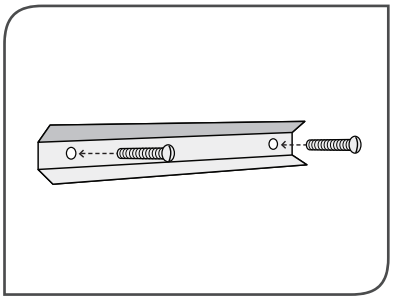




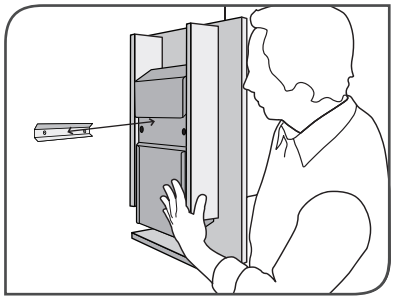
STEP 1 – Plant GroVert planter *(with frame in place)* on a flat horizontal surface by filling each of the 10 planting cells with soil and plants of your choice.



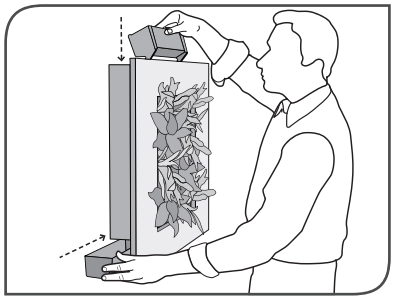
STEP 2 – Once the GroVert has been planted, we recommend a thorough watering while laying flat. Let it sit for 2 - 3 days to let the water settle.



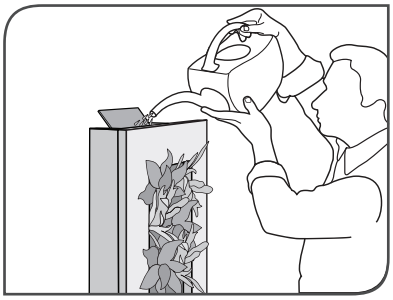
STEP 3 – Attach the mounting bracket to a secure vertical wall making sure to keep level. *(Screws not included.) (Total weight with plants is approximately 35 lbs.)*



STEP 4 – Hold planted GroVert and Frame together by placing one hand on the backside of the planter and the other hand on the underside of the frame. *(Make sure the ledge, where the collector tray goes, is "at the bottom")* Slowly set the planter and frame on the secured bracket.



STEP 5 – Slide the GroVert Irrigator into the top planter grooves for easy watering. Then slide the collector tray onto the bottom ledge of the frame to collect any excess water.



STEP 6 – Water as needed through the top Irrigator. Sit back, relax and enjoy your Living Piece of Art.
